Definition of Terms

CPI is the percent change in the average prices of goods and services commonly bought by a group of households from the base period.

Base Period is the period, usually a year, at which the index number is set to 100. It is the reference period of the index number series. The CPI is now rebased to 2012 base year from the current 2006 base year.

Market Basket refers to a sample of goods and services used to represent all goods and services bought by a particular group of consumers in a particular area. **Inflation Rate** is the annual rate of change or the year-to-year change in the CPI.

Purchasing Power of the Peso is the measure of the real value of the peso in a given period relative to a chosen base period.

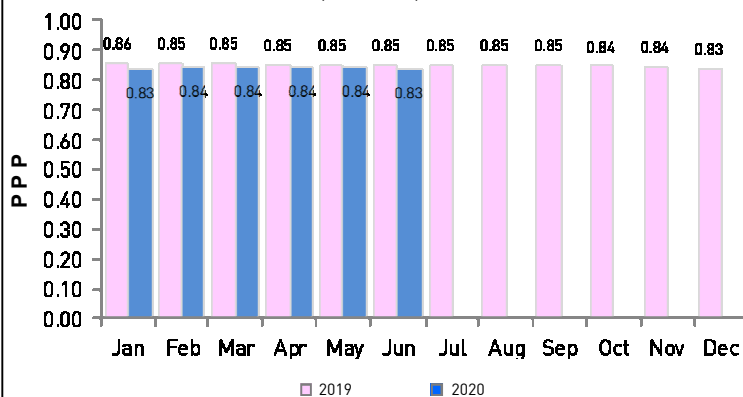

$$\text{Formula: } \text{PPP} = \frac{1}{\text{CPI}} \times 100$$
