Foreword

Gender equality is a state where women and men enjoy the same rights and privileges in society, including participation in socio-economic activities and developmental decision-making.

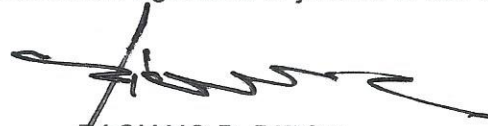

The direction of its acceptance in Metro Manila is based on internationally agreed framework and commitments, including the "Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW)", to which the Philippines acceded in 1980, and the "Beijing Platform for Action" in 1995, when several countries agreed to promote gender mainstreaming as a strategy to ensure that gender perspective is established in all policies and programs at international, national and regional levels.

In 2009, the Philippines passed Republic Act 9710, An Act providing for the Magna Carta of Women which affirms the role of women in nation building and ensures the substantive equality of women and men. The Philippines is also one of the member-countries of the UN that adopted both the Millennium Development Goals (MDGs) declaration in September 2000 which ended in 2017, and the 2030 Agenda for Sustainable Development Goals. One of the goals under the 2030 agenda is the empowerment of all women and girls. The commitments and development have made the generation of timely gender statistics imperative.

The 2021 Statistical Handbook on Women and Men in the National Capital Region (NCR) is the fourth edition to be released by the Philippine Statistics Authority, Regional Statistical Services Office of NCR. It presents the latest available gender statistics on different sectors in the region through tables and charts with brief analyses. Data disaggregation to city/municipality is also provided subject to its availability.

We hope that this publication will contribute to the government's efforts in addressing discrimination and inequality in the economic, political, social and cultural life of women and men.

We acknowledge our partners for their selfless support in providing data for this publication. We likewise encourage other government and non-government agencies to join us in our efforts to improve gender mainstreaming in the region.

REGIONAL OVERVIEW

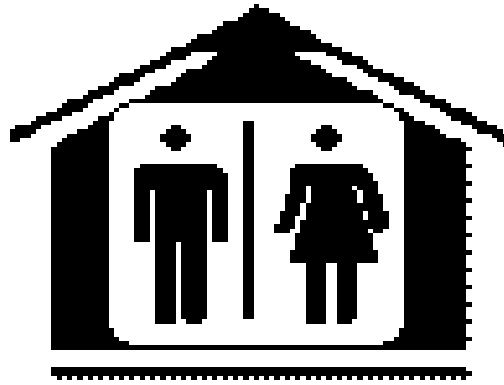

The National Capital Region (NCR) also known as the Metro Manila, is considered as the country's focal region, as it is the place of the Philippine's capital, the City of Manila, and home to the central offices of the three main branches of government. The region is divided into 4 districts that consist of 16 highly urbanized cities, and one municipality, which comprised of 1,710 barangays as of 30 June 2021.

The region's population count as of 1 May 2020 was 13,484,462 with an average annual population growth rate of 0.97 percent during the 2015-2020 period, despite being the smallest region with a land area of 615.54 square kilometers which translates to a population density of 21,765 persons per square kilometer. On July 20 25, the region's population is projected to reach 14.5 million.

In terms of economy, the Gross Regional Domestic Product (GRDP) at constant 2018 prices for the year 2020 was at 5.6 trillion pesos that contributed 32.3 percent to the National GDP. In contrast, its output is dominantly produced by the services sector with 81.0 percent of the total GRDP followed by the industry sector and agriculture and fishing sector with only 17.0% and 0.2 percent respectively. On the other hand, its approved foreign investment during to 40.4 trillion pesos in 2020 from 23.9 trillion pesos in the previous year with 69.4 percent growth between periods.

GLOSSARY OF TERMS

POPULATION AND HOUSING

Age Dependency Ratio is the ratio of persons in the “dependent” ages (generally under age 15 and over age 64) to those in the “economically productive” or “working” ages (15-64 years) in the population.

Young dependency ratio is the ratio of persons in the young dependent ages (under 15 years old) to persons in working ages (15 to 64 years).

Old dependency ratio is the ratio of persons in the old dependent ages (over 64 years) to persons in the working ages (15 to 64 years).

Ethnicity refers to the household member's identity, by blood and not by choice nor by adoption/confirmation for any ethnic group, primarily the Indigenous Peoples (IPs).

Household Population is the population enumerated in private household during a census.

Housing Unit is a structurally separate and independent place of abode, which, by the way it has been constructed, converted or arranged, is intended for habitation by one household. Structures or parts of structures which are not intended for habitation such as commercial, industrial, and cultural buildings or natural and man-made shelters such as caves, boats, abandoned trucks, culverts, and others, but which are used as living quarters by households.

Human Development Index is a measure of the average achievement in a country in three basic dimensions of human development: longevity or a long and healthy life, access to knowledge, and a decent standard of living.

Life Expectancy at Birth indicates the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life (United Nations Population Department).

Marital Status is a status of an individual in relation to marriage, classified as follows: a) Single – A person who has never been married; b) Married - A couple living together as husband and wife, legally or consensually; c) Divorced - A person whose bond of matrimony has been dissolved legally and who therefore can remarry; d) Separated - A person separated legally or not from his/her spouse because of marital discord or misunderstanding; and e) Widowed - A person whose bond of matrimony has been dissolved by death of his/her spouse.

Medium Assumption is the moderate fertility decline and moderate mortality decline.

Migration is the movement of people across a specific boundary for the purpose of establishing a new or semi-permanent residence. Two distinct types are international migration (migration between countries) and internal migration (migration within a country).

Population is the total number of individuals in a territory at a specified time.

Population Density refers to the number of persons per unit of land area (usually in square kilometers).

Population Distribution is the patterns of settlement and dispersal of a population.

Population Projections is the computation of future changes in population numbers, given certain assumptions about future trends in the rates of fertility, mortality and migration. Demographers often publish high, medium, and low projections of the same population based on different assumptions of how these rates will change in the future.

Sex Ratio is the number of males per 100 females in a population.

Total Fertility Rate is the average number of children that would be born alive to a woman (or group of women) during her lifetime if she were to pass through her childbearing years conforming to the age specific fertility rates of a given time period.

INCOME AND PRICES

Constant Prices, Value at refers to valuation of transactions, wherein the influence of price changes from the base year to the current year has been removed.
