FOREWORD

Driven by the mission of delivering relevant and reliable statistics, and the aim of helping our government leaders and lawmakers in crafting plans, formulating policies and designing programs to improve our country's gender-related commitments, the Philippine Statistics Authority National Capital Region Provincial Statistical Office I (PSA-NCR PSO I) is delighted to provide the 2024 Women and Men (WAM) for the City of Mandaluyong.

This statistical handbook, which contains relevant statistics and indicators about the city's latest gender statistics, will also serve as a useful tool for data users, clients, investors, researchers, and stakeholders, including other developmental undertakings.

2024 WAM: City of Mandaluyong presents the latest available gender statistics in the City of Mandaluyong which are presented through tables and divided into chapters; (1) Population, (2) Citizenship, (3) Vital Statistics, (4) Birth Registration Status, (5) Marital Status, (6) Literacy, (7) Education, (8) Overseas Workers, (9) Senior Citizens, (10) Functional Difficulty, and (11) Type of Building of the Housing Unit.

PSA-NCR PSO I would like to ensure the public that they will relentlessly provide timely and quality gender statistics essential for achieving an inclusive and gender-equal society.

WOMEN & MEN

POPULATION

CHAPTER 1

POPULATION

Getting accurate and complete information on the Population will enable our policy makers, government planners, and administrators to make suitable plans and programs that suit the needs of people from the national account down to barangay level. Effective planning necessitates the use of reliable, up-to-date, accurate, complete, detailed, and disaggregated information about the population and housing unit and the demographic characteristics of the population like sex.

Highlights:

1. Out of 27 barangays in the City, only four (4) barangays namely Addition Hills, Barangka Ibaba, Buayang Bato, and Mauway have a higher population of men than women.
2. The age group of 25 to 29 has the highest number of women and men.

WOMEN & MEN

VITAL STATISTICS

CHAPTER 3

VITAL STATISTICS

Vital statistics are information derived from the registered vital events such as birth, marriage, and death in the Philippines. These events are registered in a civil registry book of the City Civil Registry Office of the place where the event occurs. This type of recording is referred to as civil registration.

The PSA serves as the basic source of data for vital events. The PSA releases this information in a form of summaries or tables and no identification is made for individuals.

The results known as vital statistics are used in creating policies and programs on health by the national agencies and local government units, as well as the planners, research institutions, and the academe.

Highlights:

1. From 2020 to 2022, more male babies were being born than female.
In 2022, babies that were born male were greater than the female by 47.
2. The most common age group for males who got married in 2022 was 30 to 34, on the other hand, was the age group of 25 to 29 in females.

BIRTH REGISTRATION STATUS

CHAPTER 4

BIRTH REGISTRATION STATUS

One of the responsibilities of every individual is to make sure that vital acts and events in their lives are being registered in the national government such as their birth. Moreover, these are documents that they will need for the entirety of their lives.

Highlights:

1. There were 3,010 births that were not registered in the City of Mandaluyong wherein 1,551 were female and 1,459 were male.
2. Among the 27 barangays in Mandaluyong, Barangay Addition Hills had the greatest number of births that were not registered, 52.1 percent were female and 47.9 percent were male.

WOMEN & MEN

MARITAL STATUS

CHAPTER 5

MARITAL STATUS

Marital Status is defined as the person's state of being single, married, separated, divorced, or widowed.

Highlights:

1. One hundred twenty thousand sixty-five individuals were married in the City of Mandaluyong as of the conduct of the 2020 Census of Population and Housing (CPH). There were 60,121 females and 59,944 males who were married.
2. There were 8,897 individuals who were either divorced, separated or annulled. The age group of 45 to 49 recorded the greatest number wherein 800 were female and 479 were male.

WOMEN & MEN

LITERACY

CHAPTER 6

LITERACY

The word literacy is defined by the National Literacy Trust as the ability to read, write, speak, and listen in a way that lets us communicate effectively and make sense of the world.

Highlights:

1. There were 4,555 individuals in the City of Mandaluyong who were illiterate. Among these, 51.8 percent were male and 48.2 percent were female.
2. Barangay Addition Hills recorded 1,452 illiterate individuals wherein 746 were male and 706 were female.

WOMEN & MEN

EDUCATION

CHAPTER 7

EDUCATION

Quality education is one of the global goals included in the Sustainable Development Goals (SDG) of the United Nations membered by different countries in the world that aim to transform the world through eradicating the immersive problems in the world.

The goals have been set together with different indicators outlined through the official statistics from the national down to the city level.

The Department of Education serves as the basic source of data for education. The Philippine Statistics Authority is the official repository of official statistics and SDG indicators which monitors the success of achieving the goals through the Philippine Statistical Development Plan. The statistics were consolidated by PSA that will be helpful for the creation of policies and formulation of programs of the Local Government Unit and other agencies, including the private sector and the academe, concerning the progress and development of humanity.

Highlights:

1. Most of the Mandaleños were Bachelor's Degree Graduates, whereas 55.2 were female.
2. About 16 percent of the Bachelor's Degree Graduates were from the Barangay of Highway Hills.

WOMEN & MEN

OVERSEAS WORKERS

CHAPTER 8

OVERSEAS WORKERS

Overseas Worker Statistics in the local view will help our Overseas Filipino Workers through our policymakers and planners in the City of San Juan in all needs and support while away from their hometown. It could include security for them, more health benefits, or some aid from their family.

Highlights:

1. A total of 6,564 individuals from the City of Mandaluyong were Overseas Workers, 56.9 percent were male while 43.1 percent were female.
2. The ages of 30 to 34 and 35 to 39 have the highest number of overseas workers.

SENIOR CITIZENS

CHAPTER 9

SENIOR CITIZENS

Senior Citizens statistics will enable our policymakers and planners to prepare for conducive plans for the aged populations. Senior citizens should benefit from health insurances, for drug maintenance, and other financial aid from the government.

Growing old is too hard especially when you are poor. When you are supposed to be retiring at your home, you still need to go to work to provide food for your family.

From this chapter, you will be able to know the status of senior citizens in the City of Mandaluyong.

Highlights:

1. There are 32,451 Senior Citizens in the City of Mandaluyong, 60.3 percent were female while 39.7 were male.
2. Two hundred sixty-two senior citizens who belong to the age group of 60 to 64 are overseas workers, 161 are male and 101 are female.

WOMEN & MEN

FUNCTIONAL DIFFICULTY

CHAPTER 10

FUNCTIONAL DIFFICULTY

Persons with disability as one of the vulnerable sectors in society should be prioritized in the planning from the national down to the local level. This is where our local planners and policymakers are needed in crafting plans and policies like more road security and traffic light friendly for them, aside of course from financial benefits and discounts and exemptions from taxes. Infrastructures should also be adjusted based on their abilities.

Highlights:

1. One hundred ninety-nine individuals in the City of Mandaluyong have severe functional difficulty in seeing even if wearing eyeglasses. Among these, 51.3 percent are male while 48.7 are female.
2. One hundred sixty-six individuals in the City of Mandaluyong have severe functional difficulty in hearing even if using a hearing aid. Among these, 57.8 percent are male while 42.2 percent are female.

WOMEN & MEN

TYPE OF BUILDING OF THE HOUSING UNIT

CHAPTER 11

TYPE OF BUILDING OF THE HOUSING UNIT

The 2020 Census of Population and Housing (CPH) also involved questions regarding the housing unit of the individuals. Identifying the type of building of their housing unit and getting statistics can generate data that will be useful to policymakers and planners in terms of urban planning and design.

Highlights:

1. Two hundred thirty-six thousand seven hundred thirteen individuals occupy a single-house type of building. Among these, 50.3 percent are female while 49.7 are male.
2. There are 78 individuals living in institutional living quarters wherein 39 are male and 39 are female.
